

EPS Core Sandwich panels

Thickness	25	30	40	50	60	80	100
Max length	15000	15000	15000	15000	15000	15000	15000
Max Width	3200	3200	3200	3200	3200	3200	3200

XPS Panels find widespread applications in various industries. XPS sandwich panels are well-suited for cold storage facilities, warehouses, mobile homes and refrigerated transportation. The superior thermal insulation properties of XPS help maintain low temperatures and prevent heat transfer. In the construction sector, they are commonly used for external and internal wall insulation, roof insulation, and floor insulation. Additionally, they can enhance the thermal efficiency of cold storage facilities, warehouses, and commercial buildings.

Applications

- Cold rooms
- Wall Cladding
- Insulation Panels
